

# FX FRACTAL

## System Manual

### **Risk warning**

Before you begin trading on Real account please carefully consider your investment goals, risk and experience you have. It should be noted that Forex is a leverage based market. It should be remembered that leverage can work both in your advantage and disadvantage as well. Therefore there is high risk of losing a part or all of your financial input placed on your account and because of that you should remember to trade with the amount of money which you can lose without taking any influential financial damage.

### **Disclaimer**

Signals generated by the system are not investment recommendations. All materials included on the website, as well as all system components (indicators, instruction manual) are for educational purposes only. Creators of the system will not take any responsibility for any profit or loss/damage caused by using the system.

- Restart your MT4

FX Fractal provides very easy to read signals.

**RED Arrow = SELL SIGNAL**

**GREEN Arrow = BUY SIGNAL**

We provide 3 x different modes (templates) that fits the best: scalping/daytrading/swingtrading.

**Please note that although the indicator is using advanced filters it's good to use it with market major trend (do not trade the signals that are opposite to major trend).**

The main strength of the indicator are the settings that allows to adapt it to any trading style.

You can of course make entries more aggressive or conservative.

Fractal – is the major sensitivity level. The lower the value, the faster signals you will get. The higher the value, the more conservative signals.

X1/X2 – provides additional filter settings. **If you are advanced trader** you can check the values we recommend with the system templates and then additionally adapt it to your preferences.
